PURPOSE & PROBLEM

To connect Detailers to Vehicles...

...And make some money!

PURPOSE & PROBLEM

To connect Vehicles to Detailers..

...And make some money!

PROBLEM

Vehicle owners pay an absurd amount of money for a proper detail on their car, which can vary from \$100 all the way up too \$300.

But its not just vehicle owners, its also the detailers/washers that get ripped off from or just arent insured properly through a secure company.

Thats when...

SPLASH AUTO MOBILE WASH

...Get involved!

DEPRECIATION VALUE

FACT:

A brand new Audi A8 cost \$206,900* back in 2004...

Now you will not hesitate to f one for under \$12,000 thats not in the greatest condition, An immaculate Audi A8 is \$30k+.

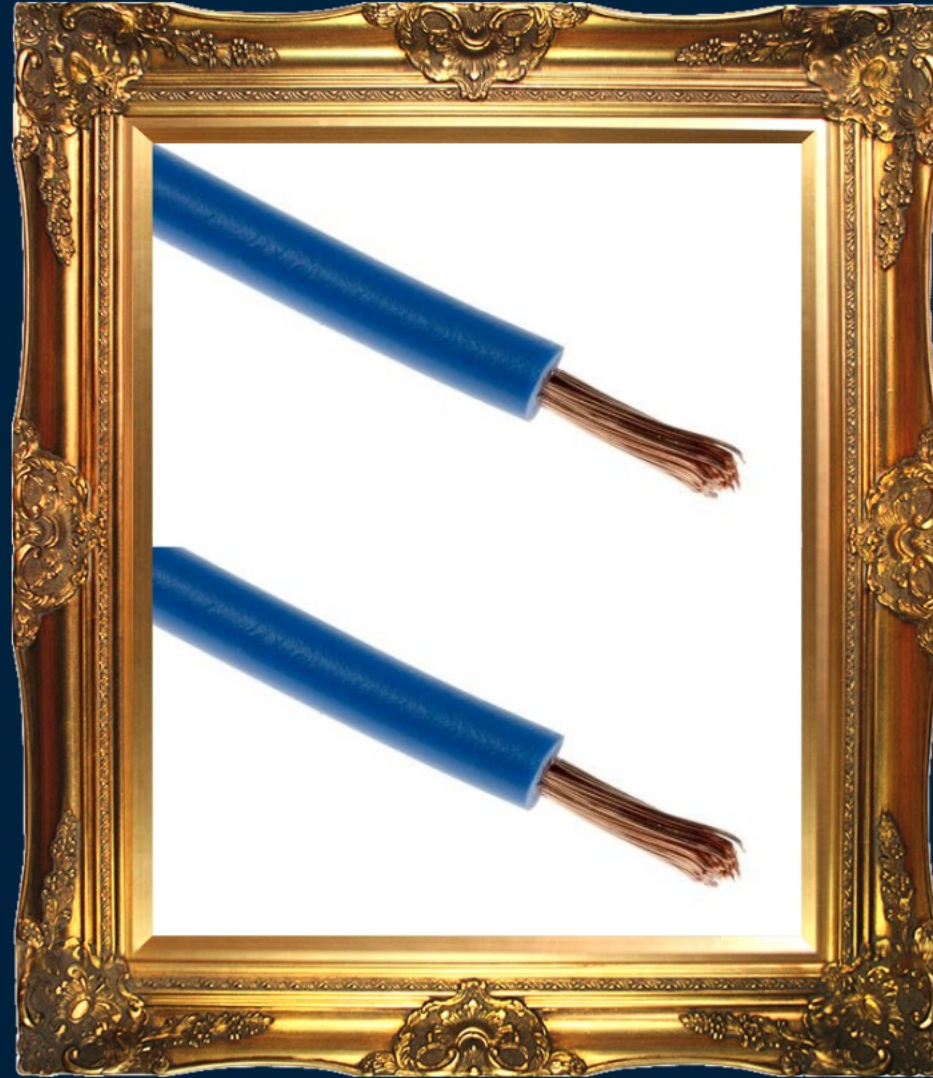

It has depreciated \$12,793/Year for over 15 years.

You can double your sale/trade value if you take care of the vehicle, such as paint protection, cleaning interior regularly & making sure scratches or dents are taken care of.

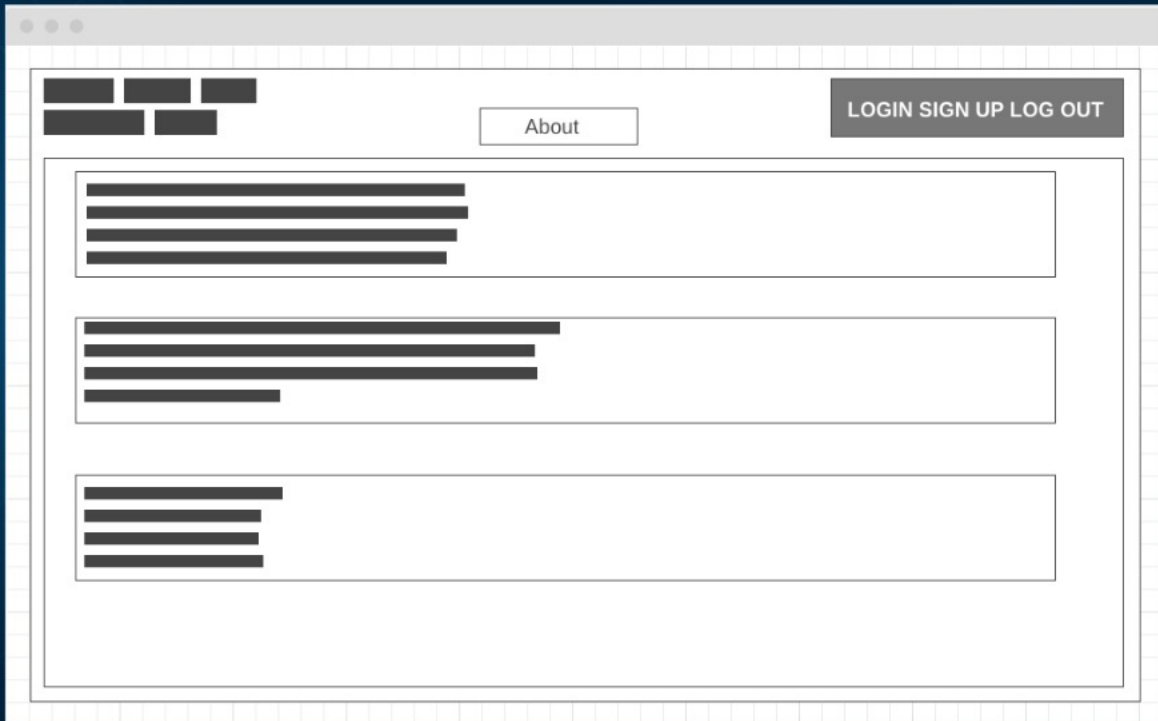

BRAIN STORMING & BULMA

During brainstorming & keeping it simple, I decided to make the wireframe as simple as possible to be able to correspond to the Bulma extensions available, I first had a look at Bulma to see what options I have, I then used the tools that were given to me.
